Invitation to enroll in the Erasmus⁺ BOOST e-learning course

BOOST is an Erasmus⁺, co-funded by the European Union, aims to strengthen agriculture and animal farming by providing an advanced training program based on the principles of sustainable Precision Agriculture. Find out more about the project: https://www.project-boost.eu/

We invite you to enroll in the BOOST e-learning Platform which is now online! This is an online course about **Precision Agriculture** which covers 3 main Areas (Agricultural, Digital/technological, and Business/marketing curriculums). For being a **pilot course** it requires the participation and evaluation by students and farmers aimed at optimizing the course. This **innovative platform** will operate both as a digital educational platform and as an online HUB on Agribusiness and Precision Agriculture.

Your **role and participation** are really **important** contributing to a mandatory phase of a European project and its success. Keep in mind that after your registration and login, you will be able to freely browse through the contents of the course and attend those you are interested, communicate with teachers, and express an evaluation.

If you complete the entire course, which is a desirable choice, consider that all trainees will receive a **Certificate of Completion** of the BOOST e-learning training.

Finally, consider that if you enrol you will also be able to participate in the last phase of the project which is a **practical training path on the field from January 2025**. In fact, BOOST is both a theoretical (online) and practical training on PA.

📌 You can find the **user guide** explaining in detail about registering, login, and training enrollment: https://www.project-boost.eu/user-guide/

👉**Visit now** the #E-learningPlatfom: https://www.project-boost.eu/courses/

⚠️**This opportunity expires August 5th.**
